## 20 Most Promising Corporate Employee Transportation Service Providers - 2018

It is often observed that with technological advancements comes a steep learning curve for the service providers and customers alike. As popular cab hailing services faced law suits from commuters facing harassment issues, safety concerns and issues that were downright awful and appalling, corporate companies had the responsibility of taking care of the safety of their employees. Incidents like these have led to the growth of Employee Transportation services in India and it is today a mammoth multimillion dollar industry.

Adhering not only to the safety needs of the employees, employee transportation services also appease corporate pain point like traffic congestion, pollution, and transporting large number of passengers, and the services most often are much cheaper than paying transportation allowances to employees. Offering reliability, security, innovation, value and customized services, corporate employee transportation services offer GPS tracking of vehicles, gun men for safety, airport pickup & drop-offs and ensure safety of the employees

and provide cost effective services for the employers. Cars, tempos, buses being the main vehicle offerings, these services deploy vehicles based on various day and night shifts, distant routes and vehicles suited for different traffic conditions as well.

Focusing the spotlight onto such major players in the Corporate Employee Transportation Services industry, siliconindia Magazine has compiled an exhaustive listing of '20 Most Promising Corporate Employee Transportation Service Providers - 2018' which envelops the employee transportation service providers who are delivering customized, value centric, technologically advanced services that best suit their clientele. This roster of listing in fact brings the attention onto the foremost service providers in the fields of corporate employee transportation and their various offerings in the said field. siliconindia editorial board along with a panel of industry experts has enumerated the front-runners in the corporate employee transportation industry by selecting the best and appropriate service providers and has put forth the insights that best assists our readers.

## Arjun Travels: Providing Holistic Service in Corporate Employee Transportation

Corporate employee transportation is complex in terms of operation and requirements. For example, a mid-size company will typically have staff of a few thousands of employees residing across the city and its outskirts. Several companies are offering transport facilities for their employees to improve productivity. Understanding the importance of safe and timely transportation at par with international standards, Mumbai headquartered, Arjun Travels is providing safe, seamless and employ-

### A big fleet allows us to provide replacement vehicles fairly quickly in case of a breakdown or periodic maintenance

ee friendly transport services for several corporations. The company provides transportation services on B2B long-term contract basis, providing AC coach services for corporate executives, short-distance shuttle services, staff-bus services for factory staff of large manufacturing plants, and chauffeur driven luxury-car services on wet-lease basis for top senior Indian and expatriate officers of large companies.

### Maintaining Seamless Mobility

The Corporate Employee Transport (CET) segment has been growing rapidly in India for the last few years. Customers look for a reliable transport partner who can provide safe, smooth & timely transportation for their employees. Concerns usually relate to safety and proper driver training. Arjun Travels addresses both these concerns by running a tight ship, ensuring periodic fleet maintenance and driver training courses. With its self-owned fleet of around 700 vehicles comprising of AC coaches, standard buses, passenger cars as well as trucks, the company is able to provide a seamless service experience for the end customer. "A big fleet allows us to provide replacement vehicles fairly quickly in case of a breakdown or periodic maintenance," states Mubarak Singh, Partner, Arjun Travels. To ensure proper maintenance of its fleet, the company has affiliations with reliable service centres across several locations and also runs its own workshop with an experienced team of mechanics in Mumbai. With its strong infrastructure, Arjun Travels is able to successfully manage the operational challenges of this business.

To stay ahead of the competition, Arjun Travels has been quick to embrace technology innovations in this industry, be it the use of RFID scanning of employee IDs, GPS based vehicle tracking systems, speed monitoring systems, 3-Point seat belts, driver-operated pneumatic passenger doors, parabolic spring suspensions, air suspensions and several other such automotive technology advancements.

### Needs of the Manufacturing Sector

Vast industrial zones are being setup across the country with several manufacturing plants requiring transportation of factory labour from nearest towns and railway stations to the industrial zones. Arjun Travels is providing this service on B2B basis to several large corporations. Buses are typically provided for various shifts in the morning, evening and night, as well as for general shift for the senior officers.

### Driving Growth in Corporate Employee Transportation

As the economy continues to expand, transportation requirements for corporate employees and factory staff will continue to grow. The use of customized commute is becoming a common practice amongst corporations. Arjun Travels is well positioned to take advantage of this trend by providing the most reliable services with the help of a strong team and its openness towards adopting new technologies such as customized MIS tool for company executives and information based app for the travellers. Future tech advancements could potentially be the development of a customised information-based app for the travellers, allowing the corporate employees to track the location of the buses on their route and provide feedback online.
